

Technician Amateur Radio Class

Place:

Henderson Fire Stations training room.
505 Sanford Street
Henderson, TN 38340

Date:

Saturdays: January 9th and 16th 9:00 to 5:00

Cost:

The book and other paperwork is \$29.95

The test is \$15.00

There is never a charge for any Ham Radio activities such as training.

Before the class we will provide:

- FCC Element 2 Amateur Radio License Preparation Manual
- Complete FCC U.S. Amateur Part 97 Rules and Regulations manual (For reference)
- W5YI Ham Study 14.0 Technician Class Software (Practice tests and help)
- 2014-2018 Technician Class Pre-Study Q & A Course

This is normally a 10 to 12 session course at a few hours each session. This will be a bit more intense so we will need to start at 9:00 sharp and move along swiftly. Lunch and refreshments will be provided both days. The test will be given at the end of the second day.

It would be a good idea to get a jump on the course by starting out reading the book and filling out the PreStudy course. Running the provided software will be a great way to see where you need to concentrate your studies. (Practice test)

With the combination of the class, book and home study software, you should have no problems. You will be leaving the last day knowing that you have accomplished your task and are now a FCC licensed Ham Radio operator.

DON'T WAIT: If you are interested or know someone that is, please contact me and we can make arrangements to get you all the pre-class material so you can be ready for this accelerated class.
